

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

I have had my annoyance calls cut back significantly. This has reduced the harrassment of my children and myself when at home.

The norm has been close to a dozen calls per day, some as early as 7:30AM, often on a Sunday morning!! This law is a god send.

I shouldn't have to pay for caller ID or privacy manager and screen all my calls just to NOT be harassed.
